

Victoria Moon

For Vice President

PROFILE

Hi! I'm Vicki, I'm a first-year historian and I'm running for Vice President. Having attended a number of the OGMs throughout the year I'd love the opportunity to contribute more to the amazing college community we have here at Merton

I would really like to continue the energy and efficiency that Lizzy has brought to the role this year.

I enjoy being organised and have a lot of experience which will help me in the role. Most usefully I worked as a supervisor in a family run café so organising the room ballot and running OGMs should hopefully prove less chaotic.

If you elect me I'd hope to be cheerful and approachable in the role but I can't promise you won't be sick of the smiley faces at the end of my emails by the end of the year :)

What would I bring to the role?

♣ I'm friendly

I'm always happy to stop and talk if I see you walking by and I'm not an intimidating person so I'd go out of my way to welcome new freshers.

♣ Organisation

I've always been very organised. Having helped sort out the college netball team for this term, I've gotten used to having to jump through administrative hoops to get things done.

♣ I'm a History student

Most weeks I only have about one or two contact hours meaning I'll be flexible and have a lot of time to dedicate to the role.

♣ Availability

Having a fair bit of free-time I spend a lot of my time on my phone or laptop so I'll have no excuse to not reply to your emails quickly when needed.

Priorities:

♣ Room Ballot

Being quite a confused fresher myself to begin with, I'd like to somewhat de-mystify the room ballot. I'd aim to make clear to incoming freshers how long they have to decide who to live with and make the process as smooth and easy as possible.

♣ Access

As Vice President part of my role would be to sit on the Access sub-committee and would look to do as much as I could to improve access. I'd hope to present Oxford as a less intimidating place and prove that it can be just as enjoyable as other universities.

♣ OGMs

I'd love to increase general involvement in OGMs and help freshers especially to better understand processes such as bringing motions or standing for positions.
