

George for Welfare

Me and men – see, I have lots of experience.

007- license to kill bad vibes

My (mainly Jana's) Ideas

As a Merton student, I am naturally a fountain of good ideas and fortunately I agree with all of Jana's.

As I grew up among animals on a farm, I really like the idea of bringing back welfare animals.

As someone who has dabbled in OxMatch, WalkMatch seems like a good (and more wholesome) idea and a great way to meet people. Walking has always helped me with stress and anxiety.

Any form of competition (as long as it's not taken too seriously) is always fun so household and college family games along with a bake off would be a fun way for freshers to get to know people.

Mainly, I want men to feel more comfortable about discussing mental health to avoid people bottling up their problems and feelings like I did, so there should be more informative events and talks about their experiences.

About Me

Hi! I'm George from university! I am a first year historian, tv and film enthusiast, book lover, music connoisseur, wannabe rugby player, semi-decent archer, general nerd and hopefully your next Male Welfare Rep (also, I'm the only candidate currently willing to run for the role).

Why Me?

Firstly, and most importantly, I'm not RON. Like, who has even heard of this RON? I've not seen him round college, how do we know he would be suitable?

Secondly, I'm an historian, that means I have very few contact hours means I will be able to manage my time flexibly, effectively and be accessible in general.

Next, I like to think I am easy going, sensitive, "not that bad [of a person]" (genuine quote) and approachable.

Penultimately, although I have not held any roles relating to male welfare in the past, I am more than willing to learn and get stuck in. We all have to start as novices at some point, right..?

Lastly, I am not ashamed to admit that I have made use of the fantastic welfare system and hence I can appreciate how valuable it is to our college community and would love to be a part of it.
